Summary

Full stack web developer with 2 years experience creating web application from start to deployment. I'm a self-starter and self-taught, which means I learn quickly and manage my work with little oversight. Eager to engage myself in an organization as motivated as myself.

Experience

6/2018 - **Web Developer**
Present *Self, Austin, TX*

- **e-Shop Project** » <https://e-commerce-project-heroku.herokuapp.com>
Leveraging the power of the Best Buy API, I built an e-commerce website from scratch using raw JavaScript code (no libraries) on the client-side and Node/Express on server-side. An SQL database was used for storing user accounts, shopping carts and favorites. Users can search and view products, create secure accounts, save products as favorites and add them to their cart.

Authentication | User Authorization | Sessions | AJAX | PostgreSQL | Node.js | Express | REST API | Data Hashing | JS (ES6+) | CSS3/Sass | BEM | HTML5

- **Forkify Project** » <https://forkify-webapp.herokuapp.com>

Search thousands of popular recipes using this fully responsive single page web application. Save favorite recipes, adjust servings sizes, create custom shopping lists and view recipe directions all on a beautiful UI.
